3-Bedroom FARMHOUSE

with • laundry center
• family room
• office

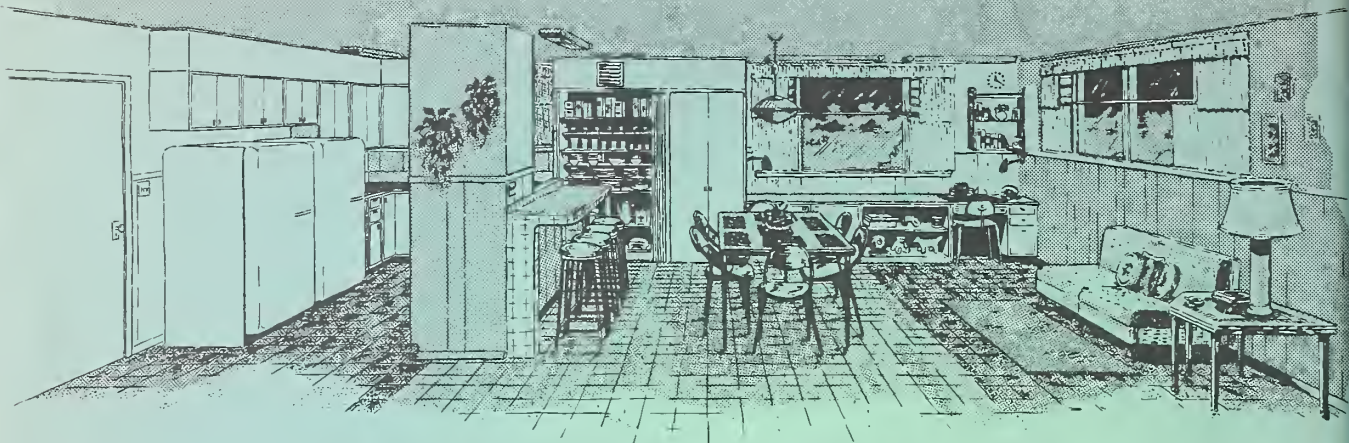

This convenient frame house has much to offer the farm family.

Room sizes and storage spaces are generous. A laundry center, located next to the sleeping area, is convenient to the source of most soiled clothing and linen. A small office near the front door provides facilities for business transactions and record keeping. The storage room off the carport may be used to store lawn furniture and garden tools. The paved porch may be screened if desired.

INTERIOR :

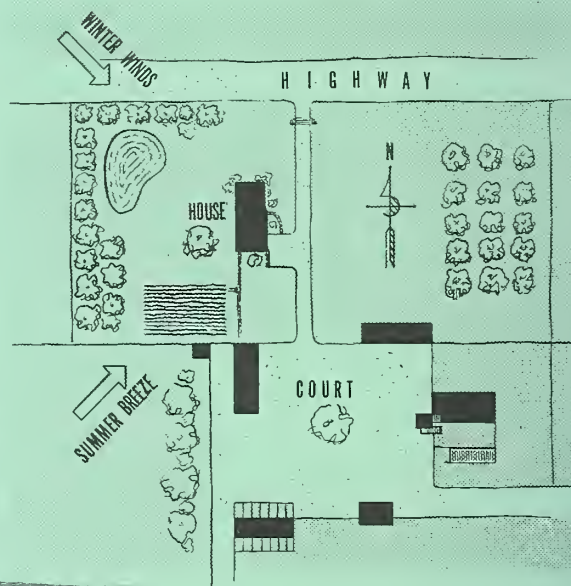

...kitchen, dining & family room

This view, looking toward the front of the house, shows the efficient and comfortable arrangement of the area devoted to family activities. The homemaker can easily supervise all activities while engaged in her usual household tasks. A desk for planning meals, a toy storage, and a sewing center are near the front window. Play space is adequate.

PLOT PLAN

The plot plan shows the position of the house in relation to a farm court. The house is located to take advantage of summer breezes and to avoid odors from the livestock area and dust from the lane. A wind-break provides protection from winter winds.

Complete working drawings may be obtained through your county agent or from the Extension agricultural engineer at most State agricultural colleges. There is usually a small charge.

ORDER PLAN NO. 7140, 3-BEDROOM FARMHOUSE

If working drawings of this plan are not available in your State, write to the U. S. Department of Agriculture, Agricultural Engineering Research Division, Plant Industry Station, Beltsville, Md. The U. S. Department of Agriculture does not distribute drawings, but will direct you to a State that does distribute them.
